MPMA'S SKILLS NEEDS RESEARCH PROJECT SURVEY QUESTIONNAIRE

We are pleased to inform that the Malaysian Plastics Manufacturers Association (MPMA) will be undertaking a research study with MONASH University to publish a report on skills development and requirements of the Malaysian plastics industry.

The plastics sector within the chemicals industry was identified as a fast track sector by the Economic Planning Unit under the Prime Minister's Department for the 11th Malaysian Plan. One of the five strategic thrust identified is accelerating human capital development to support employers and employees in training and skills to grow productivity, improve quality and increase profitability.

The focus of this research study is to meet the objectives for the plastics industry in terms of skills and training requirements as well as future skills required.

We urge all to complete and return the attached questionnaire as this would enable MPMA to work with the relevant government authorities to assist members.

For any further inquiries, please contact Malathy at Tel: 603 7876 3027 or email training@mpma.org.my.

DEADLINE TO RETURN THE COMPLETED SURVEY QUESTIONNAIRE IS BY FRIDAY, 29 JULY 2016.

Thank you.

Yours sincerely,

ST GIAM
Executive Director
